

## CHILD FIND

The Gorham School Department seeks to ensure that all children within its jurisdiction who are or will turn five in the year in which they enter school through the school in which they turn 20, and who are in need of special education and supportive assistance, including homeless children, state wards, state agency clients, students who have been suspended or expelled, children attending private schools receiving home instruction, children incarcerated in county jails, children who have the equivalent of 10 full days of unexcused absences or seven consecutive school days of unexcused absences during a school year, highly mobile children (including migrant or homeless), and children who are suspected of being disabled and in need of special education and supportive assistance even though they are advancing from grade to grade, are identified, located, and evaluated.

The Gorham School Department's Child Find responsibility shall be accomplished through a unit-wide process which, while not a definitive or final judgment of a student's capabilities or disability, is a possible indicator of special education needs. Final identification of students with disabilities and programming for such students occurs only after an appropriate evaluation and a determination by the IEP Team.

This Child Find process shall include obtaining data on each child through multiple measures, direct assessment, and parent information regarding the child's academic and functional performance, gross and fine motor skills, receptive and expressive language skills, vision, hearing and cognitive skills. The Gorham School Department may schedule Child Find activities during its annual kindergarten enrollment to assist in planning for necessary special education and related service at the start of the school year. If screening occurs in the spring prior to school entry, The Gorham School Department will refer the child to the regional Child Development Services (CDS) site within 10 school days.

If the Child Find process indicates that a student may require special education and supportive services in order to benefit from regular education, the student shall be referred to the IEP Team to determine the student's eligibility for special education services.

School staff, parents, or agency representatives or other individuals with knowledge of the child may refer children to the IEP team if they believe that the student, because of a disability, may be in need of special education and supportive services in order to benefit from regular education. Such a referral should follow the school unit's general education intervention policy.
